SUMMARY

Computer Science undergraduate with hands-on experience in enterprise web application development, QA/UAT validation, documentation, and AI/ML projects. Experienced in frontend-backend handoff, authentication and role-aware workflows, reporting logic, and business-rule implementation using TypeScript, Vue, Python, Flask/FastAPI, Laravel, SQL, and REST APIs. Interested in IT Developer roles for reliable, well-documented digital banking systems.

EDUCATION

Bina Nusantara University

Bachelor of Science in Computer Science, GPA: 3.44/4.00

Tangerang, ID

Aug. 2022 – Present

University of Malaya

Exchange Student, Computer Science

Kuala Lumpur, MY

Mar. 2025 – Aug. 2025

SKILLS

Programming: Java, SQL, Python, TypeScript, JavaScript, PHP, C/C++, C#

Web and Backend: Vue, Vuetify, Next.js, React, Laravel, Flask, FastAPI, REST APIs, Tailwind CSS

Database and Auth: Oracle Client Environment, MySQL, Supabase, JWT, SSO, RBAC

Testing and Delivery: QA Validation, UAT Scripts, Functional Testing, Requirements Mapping, API Handoff, Documentation

AI and Data: TensorFlow, PyTorch, scikit-learn, pandas, NumPy, OpenCV

Tools: Git, GitHub, VS Code, Docker, Vercel, Render

Languages: Indonesian (Native), English (IELTS Band 7.5), Japanese (NAT N5 Equivalent)

EXPERIENCE

Frontend Developer Intern / Associate Product Intern

PT Global Loyalty Indonesia – IT Corporate

Aug. 2025 – Jan. 2026

Alfa Tower, ID

- Developed and validated internal B2B web modules for Transportasi Online and parking registration workflows using Vue, Vuetify, Tailwind-based workflows, and REST-style frontend-backend handoff documentation.
- Translated vehicle registration, SIM/STNK upload, add/edit/mutasi/terminate, billing, subsidy, discount-tier, and membership rules into frontend flows, validation cases, and dashboard/reporting requirements.
- Worked with SSO v3/JWT authentication, role-aware user flows, Flask and FastAPI service integration, Oracle client/database environment, and Docker-based deployment planning in a corporate IT setting.
- Prepared UAT scripts and functional validation cases across user roles, business scenarios, mock backend behavior, and finance XLSX/PDF-style reporting outputs to improve release readiness.

Independent Software Developer

Self-directed and Community Projects

2023 – Present

Tangerang, ID

- Built and deployed full-stack applications and AI chatbot tools using TypeScript, Python, Laravel, Vue, FastAPI, SQL, and cloud platforms.
- Maintained a public GitHub portfolio spanning Python AI tools, Laravel/PHP web applications, Java coursework, machine learning notebooks, and TypeScript LMS prototyping.

Digital Drawing and Manga Class Teacher

BINUS Nippon Club

Oct. 2024 – Mar. 2025

Tangerang, ID

- Taught digital drawing workflows and provided structured feedback across university club workshop sessions, strengthening communication, mentoring, and review skills.

Research Paper Author

Bina Nusantara University

2024

Tangerang, ID

- Conducted real-time air-pollution forecasting research using IoT sensor data, ARIMA, Prophet, MLP, and stacked ensemble models; presented findings at ICOIACT.

SELECTED PROJECTS

Pasraman LMS – Learning Management System

2026

Next.js, TypeScript, Supabase/PostgreSQL, Tailwind CSS

- Built a database-backed LMS prototype for class management, learning material delivery, authentication, deployment-ready workflows, and role-aware access patterns.
- Implemented full-stack workflows using Next.js, TypeScript, and Supabase, including permission-aware user flows and hosted deployment iteration.

DartWebProg – Laravel Web Application

Sep. 2024 – Jan. 2025

Laravel, PHP, MySQL, JavaScript

- Built a Laravel web application with MySQL-backed data management, authentication, dynamic JavaScript interfaces, and structured CRUD-style workflows.
- Improved application delivery through deployment iteration and performance tuning for faster page loads.

ReINE – Residual Information Network Editing

2026

Python, PyTorch, Hugging Face

- Developed frozen-LLM persona steering experiments using lightweight residual adapters, structured training configurations, and evaluation notes for research evidence preparation.
- Compared a lightweight adapter-based approach against a larger LoRA baseline to evaluate parameter efficiency and persona-steering behavior.

AI Chatbot API – Backend Template

2025

Python, FastAPI, SQLite, REST API

- Built a structured FastAPI chatbot backend with separated API, schema, service, database, script, and testing layers for quick prototyping.
- Implemented conversation endpoints, model selection flow, local/remote model support, health checks, SQLite storage, and setup scripts.

CERTIFICATIONS AND ACHIEVEMENTS

- Alibaba Cloud Certified Associate – Cloud Computing.
- NVIDIA Certificate of Competency – Workshop/Fundamentals of Deep Learning.
- Samsung Innovation Campus Batch 5 – Stage 1 Coding and Programming, total score 91.15.
- Presenter, 7th International Conference on Information and Communications Technology (ICOIACT 2024), Japan.
